EXPERIENCE

Software Engineer - Intern Syngenta, Pune	Jan 2025 - Present
---	--------------------

- Currently working on the Cropwise Planting project, specifically focusing on Zone Management. Responsible for improving UI/UX, optimizing performance, developing new features, and writing test cases to ensure application reliability and robustness. Enhancing system performance to provide a seamless user experience in large-scale agricultural planning.

Frontend Developer - Intern Fyoocher, Mumbai	Jul 2024 - Dec 2024
--	---------------------

- Worked on a project using React.js and RESTful APIs, contributing to 3 projects that enhanced user experience and optimized data handling. Ensured responsiveness across devices, improving accessibility and usability for a wider audience. Collaborated with cross-functional teams to gather requirements and implement features that met client needs. Assisted in debugging and optimizing applications for improved performance and scalability.

PROJECTS

EchoBazar - ECommerce Developed using Next.js and MongoDB, enabling users to seamlessly browse products, manage their shopping cart, and process orders. Implemented a dynamic and responsive user interface for product browsing and checkout, with integrated Stripe payment processing to provide users with a smooth and secure shopping experience.	Live GitHub
--	---

VishwaEvents Developed using the MERN stack, enabling students to seamlessly create, manage, and register for events within the college community. Implemented an intuitive user interface for event creation and registration, with integrated ticket generation upon registration to provide attendees personalized access to events.	Live GitHub
